Size recommendations

Warm tips: any size can be customized, if necessary,
please contact customer service.

01

Reduce 1cm gap at both ends of the whole wall
 For example: the whole wall is 380cm, and the total length of rod + ending is 378cm

02

On the basis of the width of the window, there is about 15cm more on each side.
 For example: the width of the window is 180cm, and the total length of the rod + ending is about 210cm.

03

It is suggested that one side next to the wall should be provided with sealing and the other side should be equipped with decorative ending, the length of the side with decorative ending is increased by about 15cm.

Tips: the calculation formula of rod length has included the size of decorative ending! (customized products will not be returned or replaced if they are not the quality problems)
