Product Description

Electric Intelligent Honeycomb Curtain With No Punching Sun Shade, Bedroom, Bathroom

The electric honeycomb curtain is a high-end indoor sunshade decoration product that is driven by a DC motor. The motor has a small volume, low power, and is safe and reliable. It allows a maximum area of 5 square meters, a load of 5 kilograms, and a height of 3.5 meters. By using a speed control device, the rope winding device on the coaxial line is rotated, pulling the lifting rope up and down to achieve the opening and closing of the curtain fabric. Its unique limit device allows products of different specifications to accurately position up and down. At the same time, when the motor is in a locked rotor state, the power supply to the motor is automatically cut off, which can prevent the motor from being damaged by locked rotor.

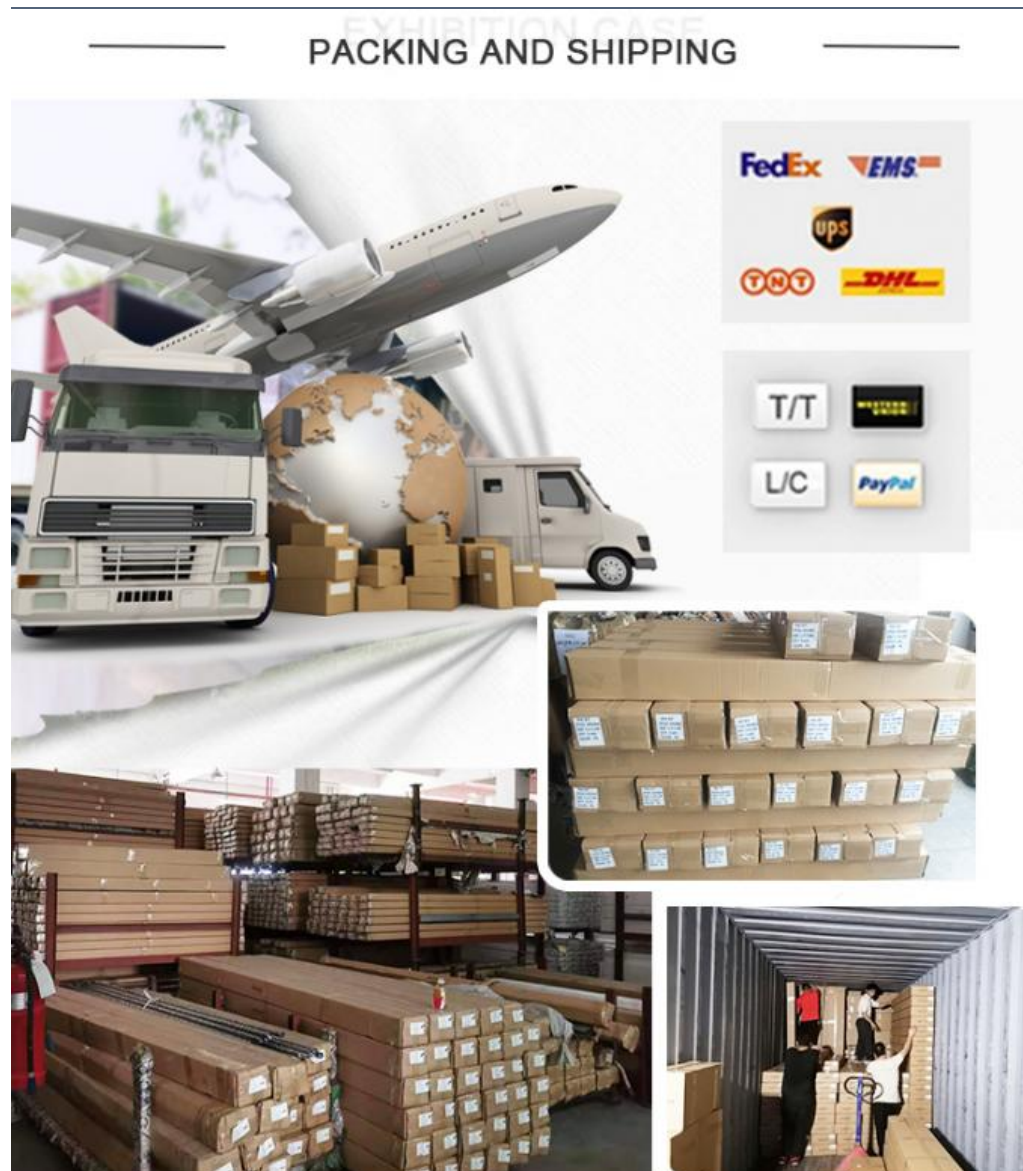

Specification

item	value
Type	Tulle
Pattern Type	Solid
is_customized	Yes
Applicable Window Type	French Window
Format	Bead Rope
Opening and Closing Method	Lower Open
Processing Accessories Cost	Included
Installation Type	Exterior Installation
